

PL-6000DCX

Two-Post Parking Lift

6,000 lb. Capacity / Shared Columns / WIDE
SKU# 5175625

UNMATCHED VERSATILITY & CONVENIENCE

The PL-6000DCX is a game-changing two-post parking lift sporting an impressive 6,000-lb. lifting capacity. This innovative lift is designed for seamless integration, featuring shared columns that maximize your space efficiency, allowing you to fit more units in a smaller area. Whether you need to install it indoors or outdoors, the PL-6000DCX delivers unmatched versatility and convenience. This lift is your ultimate solution for efficient and secure vehicle storage.

GANGED/SHARED COLUMNS

Maximize your space and minimize your costs with shared columns. This innovative design allows for multiple installations in a confined area, making the most of your available space and budget.

PROFESSIONAL PACKING & DELIVERY

BendPak's expert packaging and logistics team ensures that your PL-6000DCX arrives in perfect condition. The compact package size simplifies unloading and handling, giving you peace of mind from the moment it leaves our facilities.

DEPENDABLE HYDRAULIC OPERATION

Featuring a single direct-drive hydraulic cylinder, the PL-6000DCX eliminates the need for complex screw mechanisms. This design provides enhanced reliability, smoother operation, and lower maintenance costs, keeping your lift in great condition long after purchase.

REDUCED OPERATING COSTS

The PL-6000DCX stands out with its innovative gravity-driven lowering system, cutting down on energy consumption by eliminating the need for an electric motor. This not only boosts efficiency but also translates to lower operating costs—making it a smart choice for both professionals and enthusiasts looking for performance and savings.

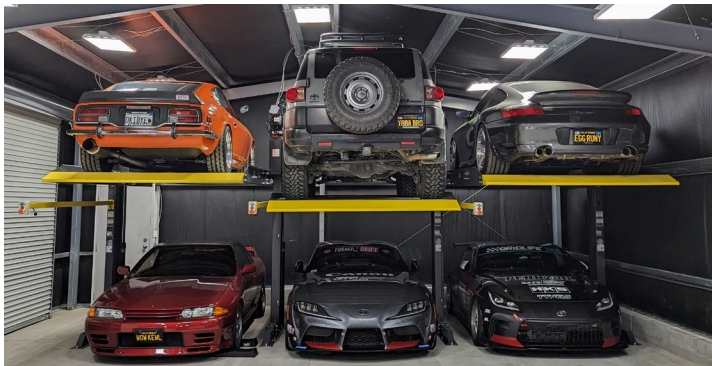

AUTOMATIC SAFETY DEVICE

Powerful load-holding devices automatically engage and lock the lift structure as it raises, preventing sudden free fall in the rare event of suspension component failure. Once raised to the desired height, the lift can be lowered onto the locks to minimize wear on suspension components, ensuring longevity and safety.

FEATURES

- Ganged column design allows multiple installations in a minimum space.
- Commercial grade design and construction
- Galvanized and corrugated anti-slip platform Freestanding design
- Full width channel-locked center panels protect lower vehicle
- Wide deck platform accommodates pickups, vans, and cars.
- Single dual telescoping direct-drive cylinder
- Manual safety lock holds platforms securely in place
- Maintenance free composite carriage bearings
- Hydraulic overloading protection
