

RFJ-3000LPF

1.5-Ton Capacity Super-Long
Low-Profile Floor Jack

SKU# 5150060

1.5
TON
CAPACITY

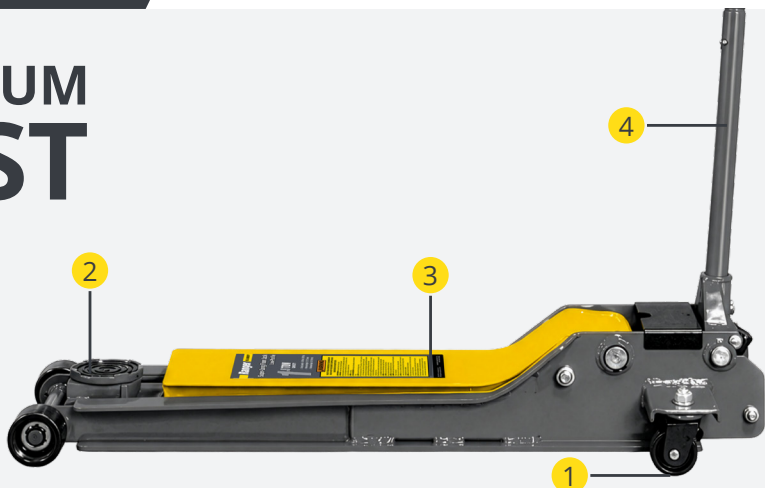

2x
Dual Piston Pump

HIGH-STRENGTH ALUMINUM BUILT TO LAST

The Ranger **RFJ-3000LPF** low rider super-long garage floor jack features a lowered profile of only 2.75". At this level, virtually every vehicle that's fit for the road can be serviced with this jack, and the extended 34" long chassis easily reaches the factory-approved jacking points on most low ground-clearance vehicles.

With a 1.5 ton lifting capacity and accurate direct-drive pump operation, this super-long garage floor jack is the ideal combination of power and precision. Plus, the Ranger **RFJ-3000LPF** is constructed out of durable heavy steel and employs double-sealed hydraulics to extend the service life, so you know it's built to last. When it comes to floor jacks, manufacturing matters.

FEATURES

Alloy-plated ram

Dual piston hydraulic system

Roller-cam plunger assembly

1 Swivel casters for easy mobility

2 Metal saddle pad

Built-in safety overload system

3 High-strength, rust-resistant hardware

4 Industrial strength powder coat finish

Double-sealed hydraulics prevents contamination and extends life
