

RFJ-3TP

3-Ton Capacity Professional Floor Jack

SKU# 5150440

3 TON
CAPACITY

2x
Dual Piston Pump

High-Strength
Steel Construction

LIGHTWEIGHT DESIGN FOR EASE-OF-USE

The **RFJ-3TP** is a versatile lifting machine designed to meet a variety of everyday duties. Capable of handling a full 6,000-lb. load, this trusty floor jack is made out of heavy-gauge steel to ensure maximum durability under tremendous pressure. As with every Ranger floor jack, the **RFJ-3TP** exceeds all ANSI standards in performance and safety.

This jack is designed to handle most residential vehicles, including light trucks and SUVs. With a 5.25" in collapsed profile, this isn't one of our super-low-profile models, but it is ideal for average sedan heights and heavier-duty vehicle types. It's also exceptional lightweight, so you get an incredible power-to-weight ratio that surely explains why this floor jack is a staple in garages worldwide.

FEATURES

Alloy-plated ram

1 Swivel casters for easy mobility

Built-in safety overload system

2 Welded lift arm assembly

3 Heavy steel construction

Sealed hydraulics prevents contamination

Double-sealed hydraulics prevents contamination and extends life

4 Metal Saddle
