

RFJ-4000AL

2-Ton Capacity Aluminum Racing Floor Jack

SKU# 5150085

2 TON
CAPACITY

2x
Dual Piston Pump

HIGH-STRENGTH ALUMINUM BUILT TO LAST

The Ranger model **RFJ-4000AL** is a lightweight aluminum racing floor jack that weighs in at 39 lbs. But don't be fooled: it packs a mean punch and is as durable as any steel jack, even though it weighs much less and takes very little effort to pump. Not to mention, the speed at which you can get any vehicle to the max rise is incredible. Three pumps will raise the jack. Four pumps will raise it to its maximum height.

This precision-built jack is constructed from high-strength aluminum and features an extra-low profile for lifting cars with low ground-clearances or side skirts. A fast-action, dual-piston quick-pump combined with a rigid knurled aluminum handle gets cars off the ground in seconds.

FEATURES

- Alloy-plated ram
- 1 Aircraft-grade billet aluminum design
- Roller-cam plunger assembly
- 2 Swivel casters for easy mobility
- 3 Rubber saddle pad
- Built-in safety overload system
- Easily portable
- 4 Protected handle design
- Oversized knurled-aluminum handle
- 5 Low-profile, single piece front roller
- Double-sealed hydraulics prevents contamination and extends life
