Mobile Tripod Jack Stand Stabilizes Up to 2-Tons of Vehicle

The RJS-2TH 2-Ton High Tripod [Jack Stand](#) is the ideal selection for stabilizing a lifted vehicle. The extended ACME screw adjusts to heights between 55" and 87", while heavy-duty rubber stabilization pads keep everything stationary and scratch-free.

Without the proper tools, transmission and engine service can be difficult. In fact, removing heavy equipment from vehicles can shift the center of gravity significantly, making it nearly impossible to rely on lift points alone to provide a stable lift for your vehicle. Luckily, Ranger's RJS-2TH high tripod stand services virtually every vehicle that can be lifted on a car lift.

Capable of hoisting up to 4,000 lbs., that support is crucial to keeping the right center of balance of your lifted vehicle. The tripod design is an architectural classic for a reason: it's efficient, powerful and almost impossible to knock over.

Features

- Perfect for holding drive-train or exhaust components
- Stabilizes vehicles that are raised on lifts
- Heavy-steel construction for maximum durability
- Quick adjust spin handle with thrust bearing
- Hardened ACME screw for easy adjustment
- Wide base provides maximum stability
- Thick, rubber adjustable pad for maximum support

Specifications

Holding Capacity	4,000 lbs. (1,814 kg)
Lowered Height	60" (1,524 mm)
Maximum Height	89" (2,260 mm)
Base Dimensions	24" x 24" (609 mm x 609 mm)
Shipping Weight	45 lbs. (20 kg)
Shipping Dimensions	47" x 9" x 3" (1,194 mm x 229 mm x 76 mm)
