Grand Prix GP-10C 2-Post Lift: Hydraulic Port Tee Fitting

BendPak TSB 189-102025

This Technical Service Bulletin intends to clarify the installation of the Hydraulic Port (M16 Tee Fitting) to the Power Side Post on the Grand Prix GP-10C 2-Post Lift. The installation is as follows:

1. Remove the dust cap and then the Nut from the M16 Tee Fitting on the **inside** of the Power Side Post.
2. Ensure that Hose **C** and Hose **B** are securely tightened to the M16 Tee Fitting.
3. From the **inside** of the Power Side Post, press the open male end of the M16 Tee Fitting out through the opening in the Post. The fitting (Hydraulic Port) should now be visible from the **outside** of the Post.
4. From the **outside** of the Post, fully tighten the previously removed Nut to the M16 Tee Fitting, securing the fitting (Hydraulic Port) to the Post as shown in the illustration below.

The GP-10C Lift is now ready for the installation of the Short Hydraulic Hose.

If you experience difficulties with these instructions, technical support and service is available on the Web at bendpak.com/support, by email at support@bendpak.com, or by phone at **(800) 253-2363**. Follow the prompts to reach service. Online chat is also available at www.bendpak.com
